

Good afternoon,

We have attached a list of items needed for your student. These items allow us to help keep them safe and healthy while attending in person learning at Tri County Schools. We are excited to have the opportunity to care for your student this upcoming year!

We will need to set up an emergency kit for your child to have in the nurse's office at school.

In this kit we will need:

- Water bottle
- Fast acting carbs/snacks
- Emergency medication such as Basqimi or Glucagon.
- An extra glucometer (if one is available)
- Ketone strips
- Extra lancets
- Alcohol prep pads
- Extra injection needles
- Extra insulin

Also we will need the latest order from the physician for the school to be able to administer insulin, the student's diabetic emergency action plan, student dosing chart/treatment order, and also the preferred/ordered treatment schedule for school.

We will be present at all of the school open houses for each building/grade if you can stop in, We would love to see all of you. If you are able to drop supplies off at the open house, it would be greatly appreciated. If you are not attending the open house please drop off supplies to the office secretaries at any day prior to school starting. You can also call our cell phone and we can meet up with you at the school building if after hours works better for you.

We can and we would like to be available for in person meetings this year to discuss any questions or concerns you may or may not have for your student.. Please let us know a time which works best for you. You can reach us by email, phone, and or text. We look forward to hearing from you. We are generally available at all hours by phone and will be present at the various school buildings throughout the day.

Sincerely,
Kimberly Thompson RN
